Marble is the most popular natural stone used for construction. Due to its structure, marble can be polished and re polished to maintain and improve its shine and is thus a common and attractive stone for building applications. Whether laid on floors or cladded on walls, marble makes each surface more elegant and beautiful. Though it needs care once installed, the possibility of rework on marbles make it a good choice among the natural stones.

Fantasy Blue is a white base marble with smoked grey waves and light blue color. An extremely rich and vibrant color, it has a super exotic appearance. Its bold hues add lot of value to your favorite places. In addition to its great appearance, this stone is very durable. Use it for interior and exterior installations, even in temperatures that dip below zero.

This stone is especially good for Wall, floor applications, countertops, fountains, pools and wall building of modern structures, including churches, public offices and high-end homes.
